DIGEST OF PROPOSED AMENDMENT

Regulation of coal combustion residuals. Amends the law requiring the department of environmental management (department) to establish a state permit program for the implementation in Indiana of the federal standards for the disposal of coal combustion residuals (CCR) in landfills and surface impoundments (the federal CCR rule). Provides that the rules adopted by the environmental rules board concerning the disposal of CCR in landfills and surface impoundments: (1) shall be consistent with the federal CCR rule; (2) shall not impose a restriction or requirement that is more stringent than the corresponding restriction or requirement imposed under the federal CCR rule; and (3) shall not impose a restriction or requirement that is not imposed by the federal CCR rule. Defines "legacy generation resource" as an electric generating facility that is directly or indirectly owned by a corporation that was originally formed for the purpose of providing power to the federal government for use in the nation's defense or in furtherance of national interests. Provides that the authority of the department to establish requirements under the state permit program is the only authority the department has to establish requirements for a surface impoundment of CCR located on the grounds of a legacy generation resource.
