- 8 is recovered so that reaffected the land in the future through
- 9 surface coal mining is minimized.
- 10 (3) Restore the land affected to a condition capable of supporting
- 11 the uses that the land was capable of supporting before mining or
- 12 higher or better uses of which there is a reasonable likelihood if:
- 13 (A) those uses do not:
- 14 (i) present an actual or a probable hazard to public health or
- 15 safety; or
- 16 (ii) pose an actual or a probable threat of water diminution
- 17 or pollution; and
- 18 (B) the permit applicant's declared proposed land use
- 19 following reclamation:
- 20 (i) is not impractical or unreasonable;
- 21 (ii) is not inconsistent with applicable land use policies and
- 22 plans;
- 23 (iii) does not involve unreasonable delay in implementation;
- 24 or
- 25 (iv) does not violate federal, state, or local law.
- 26 (4) Except as provided in subdivisions (5) and (6) and section 4
- 27 of this chapter with respect to all surface coal mining operations
- 28 backfill, compact where advisable to ensure stability or prevent
- 29 the leaching of toxic materials, and grade to restore the
- 30 approximate original contour of the land with all highwalls, spoil
- 31 piles, and depressions eliminated. Small depressions are allowed
- 32 if needed to retain moisture to assist revegetation or as otherwise
- 33 authorized under this article.
- 34 (5) In a surface coal mining operation that:
- 35 (A) is carried out at the same location over a substantial time;
- 36 (B) transects the coal deposit and the thickness of the coal
- 37 deposit relative to the volume of the overburden that is large;
- 38 and
- 39 (C) has overburden and other spoil and waste materials at a
- 40 particular point in the permit area or otherwise available from
- 41 the entire permit area that is insufficient, giving due
- 42 consideration to volumetric expansion, to restore the

approximate original contour;
 the operator, at a minimum, shall backfill, grade, and compact,
 where advisable, using all available overburden and other spoil
 and waste materials to attain the lowest practicable grade but not
 more than the angle of repose to provide adequate drainage and
 to cover all acid-forming and other toxic materials to achieve an
 ecologically sound land use compatible with the surrounding
 region.

(6) If in surface coal mining:

(A) the volume of overburden is large relative to the thickness
 of the coal deposit; and

(B) the operator demonstrates that due to volumetric
 expansion the amount of overburden and other spoil and waste
 materials removed in the course of the mining operation is
 more than sufficient to restore the approximate original
 contour;

the operator shall, after restoring the approximate contour,
 backfill, grade, and compact, where advisable, the excess
 overburden and other spoil and waste materials to attain the
 lowest grade but not more than the angle of repose and to cover
 all acid-forming and other toxic materials to achieve an
 ecologically sound land use compatible with the surrounding
 region. The overburden or spoil shall be shaped and graded in a
 way that prevents slides, erosion, and water pollution and
 revegetated in accordance with the requirements of this article.

(7) Stabilize and protect all surface areas, including spoil piles,
 affected by the surface coal mining and reclamation operation to
 effectively control erosion and attendant air and water pollution.

(8) Remove the topsoil from the land in a separate layer and:

(A) replace the topsoil on the backfill area; or

(B) if the topsoil is not used immediately;

(i) segregate the topsoil in a separate pile from other spoil;
 and

(ii) if the topsoil is not replaced on a backfill area within a
 time short enough to avoid deterioration of the topsoil,
 maintain a successful cover by quick growing plants or other
 means so that the topsoil is preserved from wind and water
 erosion, remains free of any contamination by other acid or
 toxic material, and is in a usable condition for sustaining
 vegetation when restored during reclamation.

However, if the topsoil is of insufficient quantity or of poor
 quality to sustain vegetation or if other strata are more suitable for

1 vegetation requirements, the operator shall remove, segregate, and
 2 preserve, in a like manner, the strata that are best able to support
 3 vegetation.

4 (9) Restore the topsoil or the best available subsoil that is best
 5 able to support vegetation.

6 (10) For all prime farmland as identified in IC 14-34-3-3(16),
 7 comply with the specifications for soil removal, storage,
 8 replacement, and reconstruction established by rules of the
 9 commission and do the following:

10 (A) Segregate the A horizon of the natural soil unless it is
 11 shown that other available soil materials will create a final soil
 12 that has a greater productive capacity, stockpile this material,
 13 if not used immediately, separately from other spoil, and
 14 provide needed protection from wind and water erosion or
 15 contamination by other acid or toxic material.

16 (B) Segregate the B horizon of the natural soil, or underlying
 17 C horizons or other strata, or a combination of those horizons
 18 or other strata that are texturally and chemically suitable for
 19 plant growth and equal to or more favorable for plant growth
 20 than the B horizon, in sufficient quantities to create in the
 21 regraded final soil a root zone of comparable depth and quality
 22 to that existing in the natural soil, stockpile this material, if not
 23 used immediately, separately from other spoil, and provide
 24 needed protection from wind and water erosion or
 25 contamination by other acid or toxic material.

26 (C) Replace and regrade the root zone material described in
 27 clause (B) with proper compaction and uniform depth over the
 28 regraded spoil material.

29 (D) Redistribute and grade in a uniform manner the surface
 30 soil horizon described in clause (A).

31 (11) Create, if authorized in the approved surface coal mining and
 32 reclamation plan, permanent impoundments of water on mining
 33 sites. The permittee may create the permanent impoundment only
 34 after the permittee demonstrates the following:

35 (A) The size of the impoundment is adequate for the intended
 36 purposes.

37 (B) The impoundment dam construction will be designed to
 38 achieve necessary stability with an adequate margin of safety
 39 compatible with that of structures constructed under 16 U.S.C.
 40 1006.

41 (C) The quality of impounded water will be suitable, on a
 42 permanent basis, for the intended use and discharges from the

- 1 impoundment will not degrade the water quality below water
 2 quality standards established under applicable federal and
 3 state law in the receiving stream.
 4 (D) The level of water will be reasonably stable.
 5 (E) Final grading will provide adequate safety and access for
 6 proposed water users.
 7 (F) The water impoundments will not result in the diminution
 8 of the quality or quantity of water used by adjacent or
 9 surrounding landowners for agricultural, industrial,
 10 recreational, or domestic uses.
- 11 (12) Conduct an augering operation associated with surface coal
 12 mining in a manner that maximizes the recoverability of mineral
 13 reserves remaining after the surface coal mining and reclamation
 14 operation is complete and seal all auger holes with an impervious
 15 and noncombustible material to prevent drainage except where
 16 the director determines that the resulting impoundment of water
 17 in those auger holes may create a hazard to the environment or the
 18 public health or safety. The director may prohibit augering if
 19 necessary to:
 20 (A) maximize the use, recoverability, or conservation of the
 21 solid fuel resources; or
 22 (B) protect against adverse water quality impacts.
- 23 (13) Minimize disturbances to the prevailing hydrologic balance
 24 at the mine site and associated offsite areas and to the quality and
 25 quantity of water in surface and ground water systems during and
 26 after surface coal mining and reclamation operations by doing the
 27 following:
 28 (A) Avoiding acid or other toxic mine drainage by measures
 29 such as the following:
 30 (i) Preventing or removing water from contact with
 31 toxic-producing deposits.
 32 (ii) Treating drainage to reduce toxic content that adversely
 33 affects downstream water upon being released to
 34 watercourses.
 35 (iii) Casing, sealing, or otherwise managing boreholes,
 36 shafts, and wells and keep acid or other toxic drainage from
 37 entering ground and surface water.
 38 (B) Conducting surface coal mining and reclamation
 39 operations so as to prevent, to the extent possible using the
 40 best technology currently available, violations of the effluent
 41 limitations for coal mining operations established under
 42 applicable state or federal law.

- 1 (C) Constructing siltation structures under clause (B) before
2 commencement of surface coal mining operations that will be
3 certified by an engineer licensed under ~~IC 25-31~~ **IC 25-4-3**
4 and constructed as designed and approved in the reclamation
5 plan.
- 6 (D) Cleaning out and removing temporary or large settling
7 ponds or other siltation structures from drainageways after
8 disturbed areas are revegetated and stabilized and depositing
9 the silt and debris at a site and in a manner approved by the
10 director.
- 11 (E) Restoring recharge capacity of the mined area to
12 approximate premining conditions.
- 13 (F) Avoiding channel deepening or enlargement in operations
14 requiring the discharge of water from mines.
- 15 (G) Other actions required under the permit.
- 16 (14) With respect to surface disposal of mine wastes, tailings, coal
17 processing wastes, and other wastes in areas other than the mine
18 workings or excavations, the following:
 - 19 (A) Stabilize all waste piles in designated areas through
20 construction in compacted layers, including the use of
21 incombustible and impervious materials if necessary.
 - 22 (B) Assure the following:
 - 23 (i) The final contour of the waste pile will be compatible
24 with natural surroundings.
 - 25 (ii) The site will be stabilized and revegetated according to
26 this article.
- 27 (15) Refrain from surface coal mining within five hundred (500)
28 feet of active and abandoned underground mines to prevent
29 breakthroughs and to protect the health or safety of miners.
30 However, the director shall permit an operator to mine near,
31 through, or partially through an abandoned underground mine or
32 closer to an active underground mine if the following conditions
33 exist:
 - 34 (A) The nature, timing, and sequencing of the approximate
35 coincidence of specific coal surface mining activities with
36 specific underground coal mining activities are jointly
37 approved by the regulatory authorities concerned with surface
38 coal mining regulation and the health and safety of
39 underground miners.
 - 40 (B) The operations will result in:
 - 41 (i) improved resource recovery;
 - 42 (ii) abatement of water pollution; or

- 1 (iii) elimination of hazards to the health and safety of the
- 2 public.
- 3 (16) Design, locate, construct, operate, maintain, enlarge, modify,
- 4 and remove or abandon, in accordance with the standards and
- 5 criteria used by the United States Secretary of the Interior to
- 6 ensure that flood control structures are safe and effectively
- 7 perform their functions, all existing and new coal mine waste
- 8 piles:
- 9 (A) consisting of:
- 10 (i) mine wastes;
- 11 (ii) tailings;
- 12 (iii) coal processing wastes; or
- 13 (iv) other liquid and solid wastes; and
- 14 (B) used temporarily or permanently as dams or embankments.
- 15 (17) Ensure the following:
- 16 (A) All debris, acid-forming materials, toxic materials, or
- 17 materials constituting a fire hazard are treated, buried, and
- 18 compacted or otherwise disposed of in a manner designed to
- 19 prevent contamination of ground or surface water.
- 20 (B) Contingency plans are developed to prevent sustained
- 21 combustion.
- 22 (18) Ensure that explosives are used only in accordance with the
- 23 following:
- 24 (A) IC 14-34-12.
- 25 (B) Applicable state and federal law.
- 26 (C) The rules adopted by the commission.
- 27 (19) Ensure that all reclamation efforts proceed in an
- 28 environmentally sound manner and as contemporaneously as
- 29 practicable with the surface coal mining operations. However, if
- 30 the applicant proposes to combine surface coal mining operations
- 31 with underground coal mining operations to assure maximum
- 32 practical recovery of the mineral resources, the director may grant
- 33 a variance for specific areas within the reclamation plan from the
- 34 requirement that reclamation efforts proceed as
- 35 contemporaneously as practicable and permit underground coal
- 36 mining operations before reclamation if the following conditions
- 37 are met:
- 38 (A) The director finds in writing the following:
- 39 (i) The applicant has presented, as part of the permit
- 40 application, specific, feasible plans for the proposed
- 41 underground mining operations.
- 42 (ii) The proposed underground mining operations are

- 1 necessary or desirable to assure maximum practical recovery
- 2 of the mineral resource and will avoid multiple disturbance
- 3 of the surface.
- 4 (iii) The applicant has satisfactorily demonstrated that the
- 5 plan for the underground coal mining operations conforms
- 6 to the requirements for underground coal mining in that
- 7 jurisdiction and that permits necessary for the underground
- 8 coal mining operations have been issued by the appropriate
- 9 authority.
- 10 (iv) The applicant has shown the areas proposed for the
- 11 variance are necessary for the implementation of the
- 12 proposed underground coal mining operations.
- 13 (v) Substantial adverse environmental damage, either onsite
- 14 or offsite, will not result from the delay in completion of
- 15 reclamation as required by this article.
- 16 (vi) The provisions for the offsite storage of spoil will
- 17 comply with subdivision (25).
- 18 (B) The commission has adopted specific rules to govern the
- 19 granting of variances in accordance with this subdivision.
- 20 (C) Variances granted under this subdivision are to be
- 21 reviewed by the director not more than three (3) years from the
- 22 date of issuance of the permit.
- 23 (D) Liability under the bond filed by the applicant with the
- 24 director under IC 14-34-6 is for the duration of underground
- 25 coal mining operations and until the requirements of this
- 26 section and IC 14-34-6 are fully complied with.
- 27 (20) Ensure that the construction, maintenance, and postmining
- 28 conditions of access roads into and across the site of operations
- 29 will control or prevent the following:
- 30 (A) Erosion and siltation.
- 31 (B) Pollution of water.
- 32 (C) Damage to the following:
- 33 (i) Fish or wildlife or their habitat.
- 34 (ii) Public or private property.
- 35 (21) Refrain from the construction of roads or other access ways:
- 36 (A) up a stream bed or drainage channel; or
- 37 (B) in the proximity of a channel;
- 38 that seriously alters the normal flow of water.
- 39 (22) Establish on the regraded areas and all other land affected a
- 40 diverse, an effective, and a permanent vegetative cover:
- 41 (A) of the same seasonal variety native to the area of land to be
- 42 affected; and

1 (B) that is capable of self-regeneration and plant succession at
 2 least equal in extent of cover to the natural vegetation of the
 3 area.

4 However, an introduced species may be used in the revegetation
 5 process where desirable and necessary to achieve the approved
 6 postmining land use plan.

7 (23) Assume the responsibility for successful revegetation, as
 8 required by subdivision (22), as follows:

9 (A) On lands not eligible for reining, for five (5) full years
 10 after the last year of augmented seeding, fertilizing, irrigation,
 11 or other work to assure compliance with subdivision (22).
 12 However, if the director approves a long term intensive
 13 agricultural postmining land use, the applicable five (5) or ten
 14 (10) year period of responsibility for revegetation commences
 15 at the date of initial planting for the long term intensive
 16 agricultural postmining land use. If the director issues a
 17 written finding approving a long term intensive agricultural
 18 postmining land use as part of the mining and reclamation
 19 plan, the director may grant exception to subdivision (22).

20 (B) On lands eligible for reining, for two (2) full years after
 21 the last year of augmented seeding, fertilizing, irrigation, or
 22 other work in order to ensure compliance with subdivision
 23 (22).

24 (24) Protect offsite areas from slides or damage occurring during
 25 the surface coal mining and reclamation operations and not
 26 deposit spoil material or locate any part of the operations or waste
 27 accumulations outside the permit area.

28 (25) Place all excess spoil material resulting from coal surface
 29 mining and reclamation activities to ensure the following:

30 (A) Spoil is transported and placed in a controlled manner in
 31 a position for concurrent compaction and in a manner that
 32 assures mass stability and prevents mass movement.

33 (B) The areas of disposal are within the bonded permit areas
 34 and all organic matter is removed immediately before spoil
 35 placement.

36 (C) Appropriate surface and internal drainage systems and
 37 diversion ditches are used in a manner that prevents spoil
 38 erosion and movement.

39 (D) The disposal area does not contain springs, natural
 40 watercourses, or wet weather seeps unless lateral drains are
 41 constructed from the wet areas to the main underdrains in a
 42 manner that prevents filtration of the water into the spoil pile.

- 1 (E) If placed on a slope, the spoil is placed as follows:
- 2 (i) On the most moderate slope among the slopes on which,
- 3 in the judgment of the director, the spoil could be placed in
- 4 compliance with all the requirements of this article.
- 5 (ii) If possible, upon or above a natural terrace, bench, or
- 6 berm if the placement provides additional stability and
- 7 prevents mass movement.
- 8 (F) Where the toe of the spoil rests on a downslope, a rock toe
- 9 buttress of sufficient size to prevent mass movement is
- 10 constructed.
- 11 (G) The final configuration is compatible with the natural
- 12 drainage pattern and surroundings and suitable for intended
- 13 uses.
- 14 (H) Design of the spoil disposal area is certified by an
- 15 engineer licensed under ~~IC 25-31~~ **IC 25-4-3** and in
- 16 conformance with professional standards.
- 17 (I) All other provisions of this article are met.
- 18 (26) To the extent possible using the best technology currently
- 19 available the following:
- 20 (A) Minimize disturbances and adverse impacts of the
- 21 operation on fish, wildlife, and related environmental values.
- 22 (B) Enhance those resources where practicable.
- 23 (27) Provide for an undisturbed natural barrier:
- 24 (A) beginning at the elevation of the lowest coal seam to be
- 25 mined; and
- 26 (B) extending from the outslope for a distance determined by
- 27 the director;
- 28 to serve as a barrier to slides and erosion.
- 29 (28) Replace the water supply of an owner of interest in real
- 30 property who obtains all or part of the owner's supply of water for
- 31 domestic, agricultural, industrial, or other legitimate use from an
- 32 underground or a surface source if the supply is affected by
- 33 contamination, diminution, or interruption proximately resulting
- 34 from the surface coal mine operation. This article does not affect
- 35 the right of a person to enforce or protect under applicable law the
- 36 person's interest in water resources affected by a surface coal
- 37 mining operation.
- 38 (29) Meet other criteria that are necessary to achieve reclamation
- 39 in accordance with the purposes of this article, taking into
- 40 consideration the physical, climatological, and other
- 41 characteristics of the site.
- 42 SECTION 203. IC 14-34-10-4 IS AMENDED TO READ AS

1 FOLLOWS [EFFECTIVE JANUARY 1, 2027]: Sec. 4. (a) The director
 2 may, under procedures established by rule, permit surface coal mining
 3 operations if:

4 (1) an industrial, a commercial, an agricultural, a residential, a
 5 recreational, or a public facility is proposed for the postmining
 6 use of the affected land; and

7 (2) the mining operation will remove an entire coal seam running
 8 through the upper fraction of a ridge or hill, except as provided in
 9 subsection (c)(1), by:

10 (A) removing all of the overburden; and

11 (B) creating a level plateau or a gently rolling contour;

12 (i) with no highwalls remaining; and

13 (ii) capable of supporting the postmining uses listed in
 14 subdivision (1);

15 without regard to the requirement to restore the affected land to the
 16 approximate original contour as set forth in section 2(b)(4), 3(b)(2), or
 17 3(b)(3) of this chapter.

18 (b) The director may permit the proposed uses under subsection (a)
 19 only if the following conditions are met:

20 (1) After consultation with the appropriate land use planning
 21 agencies, if any, the proposed postmining land use is considered
 22 an equal or a better economic or public use of the affected land
 23 compared with the premining use.

24 (2) The applicant presents specific plans for the proposed
 25 postmining land use and appropriate assurances that the use meets
 26 the following conditions:

27 (A) The use is compatible with adjacent land uses.

28 (B) The use is obtainable according to data regarding expected
 29 need and market.

30 (C) The use is assured of investment in necessary public
 31 facilities.

32 (D) The use is supported by commitments from public
 33 agencies where appropriate.

34 (E) The use is practicable with respect to private financial
 35 capability for completion of the proposed use.

36 (F) The use is planned according to a schedule attached to the
 37 reclamation plan so as to integrate the mining operation and
 38 reclamation with the postmining land use.

39 (G) The use is designed by an engineer licensed under
 40 ~~IC 25-31~~ **IC 25-4-3** and in conformance with professional
 41 standards established to assure the stability, drainage, and
 42 configuration necessary for the intended use of the site.

(3) The proposed use is consistent with adjacent land uses and existing state and local land use plans and programs.

(4) The governing body of the unit of general purpose government in which the land is located and a state or federal agency that the director determines to have an interest in the proposed use is provided an opportunity of not more than sixty (60) days to review and comment on the proposed use.

(5) All other requirements of this article are met.

(c) With respect to a permit granted under subsection (a) and in addition to other requirements the commission establishes by rule, the director shall require the following:

(1) The toe of the lowest coal seam and the overburden associated with the seam are retained in place as a barrier to slides and erosion.

(2) The reclaimed area is stable.

(3) The resulting plateau or rolling contour drains inward from the out slopes except at specified points.

(4) No damage is done to natural watercourses.

(5) Spoil is placed on the hilltop bench as is necessary to achieve the planned postmining land use and the operator places all excess spoil material not retained on the hilltop in accordance with section 2(b)(25) of this chapter.

(6) The operator ensures stability of the spoil retained on the hilltop and meets all other requirements of this article.

(d) The director shall review all permits issued under this section not more than three (3) years from the date of issuance unless the applicant affirmatively demonstrates that the proposed development is proceeding in accordance with the terms of the approved schedule and reclamation plan.

SECTION 204. IC 14-34-10-5 IS AMENDED TO READ AS FOLLOWS [EFFECTIVE JANUARY 1, 2027]: Sec. 5. (a) The director may grant a variance from the requirement to restore to approximate original contour set forth in section 3(b)(2) of this chapter if the following conditions exist:

(1) After approval of the appropriate state environmental agencies, the watershed control of the area is improved.

(2) Complete backfilling with spoil materials that maintains stability following mining and reclamation is required to completely cover the highwall.

(3) The owner of the surface knowingly requests in writing, as a part of the permit application, that a variance be granted so as to make the land, after reclamation, suitable for an industrial, a

commercial, a residential, a public, or a recreational use.

(4) After consultation with the appropriate land use planning agencies, if any:

(A) the potential use of the affected land constitutes an equal or a better economic or public use; and

(B) the variance is designed and certified by a professional engineer licensed under ~~IC 25-31~~ **IC 25-4-3** and is in conformance with professional standards established to assure the stability, drainage, and configuration necessary for the intended use of the site.

(b) With respect to a variance granted under subsection (a) or under IC 13-4.1-8-4(a) (before its repeal) and in addition to other requirements the commission establishes by rule, the director shall require the following:

(1) Only the amount of spoil will be placed off the mine bench as is necessary to achieve the planned postmining land use.

(2) Stability of the spoil retained on the bench is ensured.

(3) All spoil placement off the mine bench must comply with section 2(b)(25) of this chapter.

(c) The director shall review all exceptions granted under this section not more than three (3) years after the date of issuance of the permit unless the permittee affirmatively demonstrates that the proposed development is proceeding in accordance with the terms of the reclamation plan.

SECTION 205. IC 14-37-7-8, AS ADDED BY P.L.140-2011, SECTION 10, IS AMENDED TO READ AS FOLLOWS [EFFECTIVE JANUARY 1, 2027]: Sec. 8. (a) The owner or lessee of coal or another person with an interest to develop a coal resource may file with the division an affidavit that:

(1) identifies by a map prepared by an engineer licensed under ~~IC 25-31~~ **IC 25-4-3** or a geologist licensed under IC 25-17.6:

(A) the location of coal that the owner or lessee controls by deed, lease, or other instrument for later commercial production;

(B) the location of coal that is in an area targeted for later commercial production;

(C) the location of the coal seam or seams of interest; and

(D) the approximate depth of the coal seam or seams of interest; and

(2) states that the coal:

(A) can be mined using generally accepted underground mining practices; and

1 (B) is of sufficient quantity and quality to be commercially
2 saleable.

3 (b) All coal in an area designated under subsection (a) is considered
4 a commercially minable coal resource.

5 (c) An affidavit referred to in subsection (a) may be made before
6 applying for permits for the actual mining of the commercially minable
7 coal resource. The division shall:

8 (1) subject to subsection (e), keep the affidavit and map
9 confidential; and

10 (2) use the affidavit and map solely for determining if a
11 commercially minable coal resource is present in an area for
12 which a permit application has been filed under IC 14-37.

13 (d) The division shall determine if the proposed well location is in
14 an area underlain by coal identified in subsection (a) upon receipt of:

15 (1) a permit application referred to in subsection (c)(2); or

16 (2) an inquiry from a person interested in oil and gas explorations
17 or drilling a well for oil and gas purposes.

18 (e) The name of the person who filed the map referred to in
19 subsection (c) is not confidential.

(a) The **board commission** may recommend to the general assembly the addition, deletion, or reclassification of pesticides by submitting in an electronic format under IC 5-14-6 a report of the recommendations to the legislative council. In making a determination to add or reclassify a pesticide as a restricted use pesticide for all of Indiana or designated areas within Indiana, the **board commission** must find that the characteristics of a pesticide require that rules restricting the:

(1) sale;

(2) distribution; or

(3) use;
 of the pesticide by any person are necessary to prevent undue hazards
 to persons, animals, wildlife, lands, or waters, other than the pests that
 they are intended to prevent, destroy, control, or mitigate. The ~~board~~
commission shall publish the ~~board's~~ **commission's** findings in the
 Indiana Register.

(b) The ~~board~~ **commission** may adopt rules under IC 4-22-2 to do
 the following:

(1) Provide for the safe:

- (E) distribution;

- (B) strength; or
- (C) size;

to alleviate danger of spillage, breakage, or misuse.

(3) Determine the time and conditions of the:

- (A) sale;
- (B) distribution; or
- (C) use;

of restricted use pesticide products.

(4) Require that any or all restricted use pesticide products be
 purchased, possessed, or used only under:

- (B) certificates;
- (C) licenses; or
- (D) registrations;

under this subsection to maintain records as to the use of the

restricted use pesticide products.

(c) The state chemist shall maintain a list of each class of pesticides adopted by Indiana law or **board commission** rule on the website for the state chemist. Failure to include a pesticide on the list does not exempt a person from compliance with a law or rule for a pesticide designated by law or rule.

 17 However, a statewide code of fire safety laws or building laws
 18 governing outdoor event equipment that is adopted by the ~~commission~~
 19 **department** under this section after March 14, 2012, takes precedence

 42 the state fairgrounds. This subsection does not limit the authority of a

unit (as defined in IC 36-1-2-23) under IC 36-7-2-9 to enforce building laws and orders and written interpretations related to building laws.

(b) To qualify for a variance, an applicant must pay the fee set under IC 22-12-6-6 and file an application, on a form approved by the department, that contains facts demonstrating that:

(1) compliance with the rule will impose an undue hardship upon the applicant or prevent the preservation of an architecturally significant or historically significant part of a building or other structure; and

(2) either:

(A) noncompliance with the rule; or

(B) compliance with an alternative requirement approved by the body considering the variance application; will not be adverse to the public health, safety, or welfare.

SECTION 552. IC 22-15-5-16, AS AMENDED BY P.L.186-2025, SECTION 123, IS AMENDED TO READ AS FOLLOWS [EFFECTIVE JULY 1, 2026]: Sec. 16. (a) A practitioner shall comply with the standards established under this licensing program. A practitioner is subject to the exercise of the disciplinary sanctions under IC 22-12-7-7 if the department finds that a practitioner has:

(1) engaged in or knowingly cooperated in fraud or material deception in order to obtain a license to practice, including cheating on a licensing examination;

(2) engaged in fraud or material deception in the course of professional services or activities;

(3) advertised services or goods in a false or misleading manner;

(4) falsified or knowingly allowed another person to falsify attendance records or certificates of completion of continuing education courses provided under this chapter;

(5) been convicted of a crime that has a direct bearing on the practitioner's ability to continue to practice competently;

(6) knowingly violated a state statute or rule or federal statute or regulation regulating the profession for which the practitioner is licensed;

(7) continued to practice although the practitioner has become unfit to practice due to:

(A) professional incompetence;

(B) failure to keep abreast of current professional theory or practice;

(C) physical or mental disability; or

(D) addiction to, abuse of, or severe dependency on alcohol or other drugs that endanger the public by impairing a practitioner's ability to practice safely;

(8) engaged in a course of lewd or immoral conduct in connection with the delivery of services to the public;

(9) allowed the practitioner's name or a license issued under this chapter to be used in connection with an individual or business who renders services beyond the scope of that individual's or business's training, experience, or competence;

(10) had disciplinary action taken against the practitioner or the practitioner's license to practice in another state or jurisdiction on grounds similar to those under this chapter;

(A) used by another person; or

(b) If an applicant or a practitioner has engaged in or knowingly cooperated in fraud or material deception to obtain a license to practice, including cheating on the licensing examination, the department may rescind the license if it has been granted, void the examination or other fraudulent or deceptive material, and prohibit the applicant from reapplying for the license for a length of time established by the department.

(c) The department may deny licensure to an applicant who has had disciplinary action taken against the applicant or the applicant's license

 3 disciplinary action is conclusive evidence of the other jurisdiction's
 4 disciplinary action.

5 (d) The department may order a practitioner to submit to a
 6 reasonable physical or mental examination if the practitioner's physical
 7 or mental capacity to practice safely and competently is at issue in a
 8 disciplinary proceeding. Failure to comply with a department order to
 9 submit to a physical or mental examination makes a practitioner liable
 10 to temporary suspension under subsection (h).

11 (e) Except as provided under subsection (f) or (g), a license may not
 12 be denied, revoked, or suspended because the applicant or holder has
 13 been convicted of an offense. The acts from which the applicant's or
 14 holder's conviction resulted may, however, be considered as to whether
 15 the applicant or holder should be entrusted to serve the public in a
 16 specific capacity.

17 (f) The department may deny, suspend, or revoke a license issued
 18 under this chapter if the individual who holds the license is convicted
 19 of any of the following:

 35 its amendment on July 1, 2015).

- 16 (1) notice of board meetings and other communication services;

- 38 days after adoption of the minutes by the board;

- 40 website within fourteen (14) calendar days of the vacancy;
- 41 (8) notwithstanding any other law:

- 5 (9) shall send notification of incomplete items in an application
- 6 to the applicant every fourteen (14) calendar days after the
- 7 applicant initiates the application until the earlier of the
- 8 following:
- 9 (A) The date the application is completed.
- 10 (B) One (1) calendar year after the applicant initiates the
- 11 application; **and**

- 14 (c) In administering the renewal of licenses or certificates under this
- 15 chapter, the agency shall send a notice of the upcoming expiration of

- 17 ninety (90) days before the expiration of the license or certificate. The
- 18 notice must inform the holder of the license or certificate of the need
- 19 to renew and the requirement of payment of the renewal fee. If this
- 20 notice of expiration is not sent by the agency, the holder of the license
- 21 or certificate is not subject to a sanction for failure to renew if, once
- 22 notice is received from the agency, the license or certificate is renewed
- 23 within forty-five (45) days after receipt of the notice.
- 24 (d) In administering an examination for licensure or certification,
- 25 the agency shall make the appropriate application forms available at
- 26 least thirty (30) days before the deadline for submitting an application
- 27 to all persons wishing to take the examination.
- 28 (e) The agency may require an applicant for license renewal to
- 29 submit evidence proving that:
- 30 (1) the applicant continues to meet the minimum requirements for
- 31 licensure; and
- 32 (2) the applicant is not in violation of:
- 33 (A) the statute regulating the applicant's profession; or
- 34 (B) rules adopted by the board regulating the applicant's
- 35 profession.
- 36 (f) The agency shall process an application for renewal of a license
- 37 or certificate:
- 38 (1) not later than ten (10) days after the agency receives all
- 39 required forms and evidence; or
- 40 (2) within twenty-four (24) hours after the time that an applicant
- 41 for renewal appears in person at the agency with all required
- 42 forms and evidence.

1 This subsection does not require the agency to issue a renewal license
2 or certificate to an applicant if subsection (g) applies.

3 (g) The agency may delay issuing a license renewal for up to one
4 hundred twenty (120) days after the renewal date for the purpose of
5 permitting the board to investigate information received by the agency
6 that the applicant for renewal may have committed an act for which the
7 applicant may be disciplined. If the agency delays issuing a license
8 renewal, the agency shall notify the applicant that the applicant is being
9 investigated. Except as provided in subsection (h), before the end of the
10 one hundred twenty (120) day period, the board shall do one (1) of the
11 following:

12 (1) Deny the license renewal following a personal appearance by
13 the applicant before the board.

14 (2) Issue the license renewal upon satisfaction of all other
15 conditions for renewal.

16 (3) Issue the license renewal and file a complaint under IC 25-1-7.

18 a personal appearance by the applicant before the board, renew
19 the license and place the applicant on probation status under
20 IC 25-1-9-9.

21 (h) If an individual fails to appear before the board under subsection
22 (g), the board may take action on the applicant's license allowed under
23 subsection (g)(1), (g)(2), or (g)(3).

24 (i) The applicant's license remains valid until the final determination
25 of the board is rendered unless the renewal is denied or the license is
26 summarily suspended under IC 25-1-9-10.

27 (j) The license of the applicant for a license renewal remains valid
28 during the one hundred twenty (120) day period unless the license
29 renewal is denied following a personal appearance by the applicant
30 before the board before the end of the one hundred twenty (120) day
31 period. If the one hundred twenty (120) day period expires without
32 action by the board, the license shall be automatically renewed at the
33 end of the one hundred twenty (120) day period.

34 (k) The board's renewal of a license does not preclude the board
35 from imposing sanctions on the licensee as a result of a complaint filed
36 by the attorney general after renewal of the license.

37 (l) Notwithstanding any other statute, the agency may stagger
38 license or certificate renewal cycles. However, if a renewal cycle for a
39 specific board or committee is changed, the agency must obtain the
40 approval of the affected board or committee.

41 (m) An application for a license, certificate, registration, or permit
42 is abandoned without an action of the board, if the applicant does not

complete the requirements to complete the application within one (1) year after the date on which the application was filed. However, the board may, for good cause shown, extend the validity of the application for additional thirty (30) day periods. An application submitted after the abandonment of an application is considered a new application.

(1) will affect multiple boards; and

(2) is not inconsistent with any rule adopted by the affected board.

SECTION 606. IC 25-4-3 IS ADDED TO THE INDIANA CODE AS A NEW CHAPTER TO READ AS FOLLOWS [EFFECTIVE JANUARY 1, 2027]:

Chapter 3. Regulation of Engineers

Sec. 1. The board shall enforce and administer the provisions of this chapter, and adopt rules, not inconsistent with the Constitution and laws of this state, as may be reasonably necessary for the proper performance of its duties and the regulations of the proceedings before it. The board shall adopt rules establishing standards for the competent practice of engineering and for the administration of the registered professional engineers and registered engineering interns investigative fund established by section 20 of this chapter. Any rulemaking by the board shall be in accordance with IC 4-22-2.

Sec. 2. (a) Except as provided in IC 25-31-1-35 and subsection (b), the licensing agency shall receive and account for all money collected under the provisions of this chapter and shall deposit the money with the treasurer of state to be deposited by the treasurer of state in the general fund of the state.

(b) In addition to the registration fee established under section 13(c) of this chapter, the board shall establish a fee of not more than twenty dollars (\$20) for registered professional engineers and registered engineering interns to be paid at the time of:

- (1) issuance of a certificate of registration; and**
- (2) renewal of a certificate of registration;**

under this chapter to provide funds for administering and enforcing this chapter, including investigating and taking action against persons violating this chapter. All funds collected under this subsection shall be deposited into the registered professional engineers and registered engineering interns investigative fund established by section 20 of this chapter.

Sec. 3. (a) The following under either subdivision (1) or (2) shall be considered as minimum evidence that the applicant is qualified for registration as a professional engineer:

(1) All of the following:

(A) Graduation in an approved engineering curriculum of four (4) years or more.

(B) A specific record of four (4) years or more of progressive experience on engineering projects of sufficient quality acquired subsequent to graduation, which experience indicates that the applicant is qualified to be placed in responsible charge of engineering work requiring the exercise of judgment in the application of engineering sciences to the sound solution of engineering problems.

(C) The successful passing of an examination as provided for in section 5 of this chapter.

(2) All of the following:

(A) A specific record of eight (8) years or more of engineering education and experience in engineering work, which indicates that the applicant has acquired knowledge and skill and practical experience in engineering work approximating that required for registration as a professional engineer under subdivision (1).

(B) The successful passing of an examination as provided for in section 5 of this chapter.

(b) The following under either subdivision (1) or (2) shall be considered as minimum evidence that the applicant is qualified for certification as an engineering intern:

(1) All of the following:

(A) Graduation in an approved engineering curriculum of four (4) years or more.

(B) The successful passing of an engineering intern examination as provided in section 5 of this chapter.

(2) All of the following:

(A) A specific record of four (4) years or more of engineering education and experience in engineering work indicating that the applicant has acquired knowledge and

1 skill approximating that acquired through graduation in
 2 an approved engineering curriculum of four (4) years or
 3 more.

4 (B) The successful passing of an engineering intern
 5 examination as provided in section 5 of this chapter.

6 (c) The board may waive the examination under section 5 of this
 7 chapter to any applicant who has been granted a certificate of
 8 registration under section 13 of this chapter.

9 (d) An individual is not eligible for registration as a professional
 10 engineer or certification as an engineering intern if the individual
 11 has been convicted of:

12 (1) an act which would constitute grounds for disciplinary
 13 sanction under IC 25-1-11; or

14 (2) a felony that has a direct bearing on the individual's ability
 15 to practice competently.

16 (e) In considering the qualifications of applicants, responsible
 17 charge of engineering teaching shall be construed as responsible
 18 charge of engineering work. An applicant who holds a degree of
 19 master of science of engineering or the equivalent thereof from a
 20 curriculum in engineering approved by the board may be given a
 21 maximum credit of one (1) year of experience in addition to the
 22 credit of four (4) years of education. An applicant who holds a
 23 degree of doctor of philosophy or the equivalent thereof from a
 24 curriculum in engineering approved by the board may be given a
 25 maximum of credit of two (2) years of experience in addition to a
 26 credit of four (4) years of education. Graduation in a course other
 27 than engineering from a college or university acceptable to the
 28 board may be considered as equivalent to two (2) years engineering
 29 experience and education. The mere execution, as a contractor of
 30 work designed by a professional engineer, or the supervision of the
 31 construction of such work as a foreman or superintendent shall not
 32 be deemed to be engineering experience.

33 (f) Any person having the necessary qualifications to be
 34 registered under this chapter is eligible for registration although
 35 the individual may not be engaged in the practice of engineering at
 36 the time the application is made.

37 Sec. 4. (a) An individual applying for registration as a
 38 professional engineer or for certification as an engineering intern
 39 shall apply for registration or certification on a form prescribed
 40 and provided by the board. Each application for registration shall
 41 contain statements showing the education and qualifications of the
 42 applicant and a detailed summary of the technical work performed

1 by the applicant. An application for registration as a professional
 2 engineer shall be accompanied by the names of five (5) persons to
 3 be used as references, at least three (3) of whom are professional
 4 engineers who have a personal knowledge of the experience of the
 5 applicant. Each application for a certification as an engineering
 6 intern must contain statements showing the education of the
 7 applicant, and except for an application for an examination to be
 8 given during the applicant's senior year, the application shall be
 9 accompanied by the names of three (3) persons to be used as
 10 references. All applications shall be certified to by the applicant as
 11 to the correctness of the statements contained in the application.

12 (b) A person who knowingly makes a false statement in the
 13 application commits a Class A misdemeanor.

14 (c) The amount of registration fees for a professional engineer
 15 and for an engineering intern shall be fixed and determined by the
 16 board under IC 25-1-8-2. The board shall also in its rules prescribe
 17 the manner and the time for the paying of registration fees.

18 (d) In the event the board refuses to issue a certificate of
 19 registration to any person who has made proper application for
 20 registration as a professional engineer, any initial fee prescribed by
 21 the board and deposited with the board by an applicant shall be
 22 retained by the board as an application fee.

23 (e) In the event the board refuses to issue a certificate to any
 24 person who has made proper application for certification as an
 25 engineering intern, the fee prescribed by the board and deposited
 26 by the applicant with the board shall be retained as an application
 27 fee.

28 Sec. 5. (a) The examination required of all applicants for
 29 registration as a professional engineer shall be a written or
 30 computer based examination which shall be divided into the
 31 following two (2) parts:

32 (1) Engineering fundamentals.

33 (2) Principles and practice of engineering.

34 The board may adopt rules under IC 4-22-2 establishing additional
 35 examination requirements.

36 (b) The engineering fundamentals portion of the examination
 37 shall be designed to test the applicant's knowledge of mathematics
 38 and the physical and engineering sciences. The standards of
 39 proficiency required shall approximate that attained by graduation
 40 in an approved four (4) year engineering curriculum.

41 (c) The principles and practice of the engineering portion of the
 42 examination shall be designed primarily to test the applicant's

1 understanding of, and judgment and ability to apply correctly, the
2 principles of:

- 3 (1) mathematics;
- 4 (2) the physical sciences;
- 5 (3) the engineering sciences; and
- 6 (4) engineering design analysis and synthesis;

7 to the practice of professional engineering. A part of the
8 examination may be designed to test the applicant's knowledge and
9 understanding of the ethical, economic, and legal principles
10 relating to the practices of professional engineering.

11 (d) An applicant for registration as a professional engineer who
12 holds an engineering intern certificate issued in Indiana or in any
13 other state or territory having equivalent standards may be
14 exempted from the engineering fundamentals portion of the
15 examination.

16 (e) An applicant must successfully pass the engineering
17 fundamentals portion of the examination before taking the
18 principles and practice portion of the examination.

19 (f) Examinations shall be held at times and places as determined
20 by the board at least two (2) times each year. Examinations for
21 certification as an engineering intern may be held separately from
22 the examinations for registration as a professional engineer.

23 (g) An applicant for registration as a professional engineer who
24 is presently registered in another state or territory may be assigned
25 a written or computer based examination as the board deems
26 necessary to meet the requirements of this chapter.

27 (h) An applicant shall have three (3) attempts to pass each part
28 of the examination within a time period established by the board
29 by rule. The board may specify by rule the time required between
30 examinations and the opportunity for future examination attempts
31 for an applicant who fails to appear at an examination. The
32 amount of the fee to be paid for each examination shall be
33 determined by the board under IC 25-1-8-2.

34 (i) If an applicant who has failed a part of the examination three
35 (3) times reapplies and submits evidence of acquiring additional
36 knowledge for the examination, the board may give the applicant
37 approval to take subsequent examinations or partial examinations.

38 Sec. 6. (a) The board shall issue a certificate of registration,
39 upon the payment of the fee prescribed by the board under
40 IC 25-1-8-2 and the fee established by section 2(b) of this chapter,
41 to any applicant who, in the opinion of the board, has satisfactorily
42 met all requirements of this chapter. In the case of a professional

1 engineer, the certificate shall authorize the practice of
2 "professional engineering". The certificate of registration shall:

- 3 (1) show the full name of the registrant;
- 4 (2) bear a serial number and date; and
- 5 (3) be signed by a designee of the board.

6 The issuance of any certificate of registration by the board under
7 this chapter is evidence that the individual named on the certificate
8 is entitled to all the rights and privileges of a registered
9 professional engineer from the date on the certificate until it
10 expires or is revoked.

11 (b) The board shall issue a certificate of enrollment upon the
12 payment of the certificate fee prescribed by the board under
13 IC 25-1-8-2 to any applicant who, in the opinion of the board, has
14 satisfactorily met all of the requirements of this chapter. In the
15 case of an engineering intern, the certificate shall state that the
16 applicant has successfully passed the examination in engineering
17 fundamentals and has been enrolled as an engineering intern. The
18 certificate of enrollment shall:

- 19 (1) show the full name of the enrollee;
- 20 (2) bear a serial number and date; and
- 21 (3) be signed by the director of the licensing agency.

22 The issuance of a certificate of enrollment by the board is evidence
23 that the individual named on the certificate is entitled to all the
24 rights and privileges of an engineering intern while the certificate
25 remains unrevoked or until it expires.

26 Sec. 7. (a) The granting of registration extends to the registrant
27 the authority to use a seal of a design approved by the board
28 bearing the registrant's name, registration number, and the legend
29 "professional engineer".

30 (b) During the period of time that a registrant's certificate is
31 valid, the registrant is authorized to apply the registrant's seal to
32 plans, specifications, studies, drawings, and reports. Applying the
33 registrant's seal attests that:

- 34 (1) the work embodies the engineering work of the registrant;
- 35 (2) the registrant or an employed subordinate supervised by
36 the registrant prepared the documents, and in the context of
37 engineered plans "prepared" refers to the registrant's control
38 and direction of the engineering work and design process;
- 39 (3) the registrant assumes full professional responsibility for
40 the documents; and
- 41 (4) the work meets standards of acceptable engineering
42 practice.

1 (c) It is unlawful for any person to stamp or seal any document
 2 with a seal after the certificate of the registrant named on the seal
 3 has expired or has been revoked.

4 Sec. 8. (a) Subject to IC 25-1-2-6(e), unless renewed, a certificate
 5 issued under this chapter expires on a date specified by the
 6 licensing agency under IC 25-1-6-4 and expires biennially after the
 7 initial expiration date. An applicant for renewal shall submit an
 8 application in the manner prescribed by the board and pay the
 9 renewal fee established by the board under IC 25-1-8-2 on or
 10 before the renewal date specified by the licensing agency.

11 (b) Subject to IC 25-1-2-6(e), if the holder of a certificate does
 12 not renew the certificate by the date specified by the licensing
 13 agency, the certificate expires and becomes invalid without the
 14 board taking any action.

15 (c) The failure on the part of a registrant to renew a certificate
 16 does not deprive the registrant of the right of renewal.

17 (d) If a certificate has been expired for not more than three (3)
 18 years, the certificate may be reinstated by the board if the holder
 19 of the certificate meets the requirements for reinstatement under
 20 IC 25-1-8-6(c).

21 (e) If a certificate has been expired for more than three (3)
 22 years, the certificate may be reinstated by the board if the holder
 23 of the certificate meets the requirements for reinstatement under
 24 IC 25-1-8-6(d).

25 Sec. 9. (a) The board may adopt rules requiring a professional
 26 engineer to obtain continuing education for renewal of a certificate
 27 under section 8 of this chapter.

28 (b) If the board adopts rules under this section, the rules must
 29 do the following:

30 (1) Establish an inactive certificate of registration that:

31 (A) does not require the holder of an inactive certificate to
 32 obtain continuing education; and

33 (B) prohibits the holder of an inactive certificate from
 34 practicing engineering.

35 (2) Establish requirements for reactivation of an inactive
 36 certificate.

37 Sec. 10. (a) A registration certificate for a professional engineer
 38 may be issued only to a natural person.

39 (b) A business, including a proprietorship, partnership, or
 40 corporation, doing business in Indiana may not practice or offer to
 41 practice engineering unless that practice is carried on under the
 42 responsible direction and supervision of a registered professional

1 engineer who is a full-time employee of the business. All plans,
 2 sheets of designs, specifications, reports, studies, or other
 3 engineering documents that require certification and are prepared
 4 by the personnel of a business must carry the signature and seal of
 5 the registered professional engineer who is in responsible charge
 6 of the professional engineering work.

7 Sec. 11. (a) A county, city, town, township, school corporation,
 8 or other political subdivision of this state may not engage in the
 9 construction or maintenance of any public work involving the
 10 practice of engineering for which plans, specifications, and
 11 estimates have not been prepared, certified, and sealed by, and the
 12 construction and maintenance executed under the direct
 13 supervision of, a professional engineer. Any contract executed in
 14 violation of this section is void.

15 (b) An official of this state, or of any city, town, county,
 16 township, or school corporation, charged with the enforcement of
 17 any law, ordinance, or rule relating to the design, construction, or
 18 alteration of buildings or structures may not use or accept or
 19 approve any plans or specifications that have not been prepared
 20 by, or under the supervision of and certified by, a registered
 21 professional engineer. This subsection does not apply:

22 (1) to plans or specifications prepared by, or under the
 23 supervision of and certified by, an architect who is registered
 24 under IC 25-4-1;

25 (2) to structures and construction listed in IC 22-15-3-3(a); or

26 (3) to plans or specifications contained in a registration,
 27 license, or permit application, including an application for an
 28 initial permit, the renewal of a permit, the modification of a
 29 permit, or a variance from a permit submitted to the
 30 commissioner of the department of environmental
 31 management under IC 13, unless the permit is for the
 32 approval of plans or specifications for construction for which
 33 a professional engineer's seal is required by operation of
 34 either state or federal law, rule, or regulation. This subsection
 35 does not require a professional engineer's seal for an
 36 application for an air quality construction permit under 326
 37 IAC 2-1-3.

38 This section shall not be construed as to abridge or otherwise affect
 39 the powers of any state board or department to issue rules
 40 governing the safety of buildings or structures.

41 (c) All maps required to show the underground workings of any
 42 mine in Indiana must be prepared, certified, and sealed by a

professional engineer or professional surveyor.

Sec. 12. (a) An employee or a subordinate of any person who holds a certificate of registration under the provisions of this chapter is exempt from the provisions of this chapter if the practice of the employee or subordinate does not include responsible charge of design or supervision.

(b) This chapter does not require registration for the purpose of practicing engineering by an individual or a business:

(1) on property owned or leased by that individual or business unless the engineering practice involves the public health or safety, or the health or safety of the employees of that individual or business;

(2) for the performance of engineering which relates solely to the design or fabrication of manufactured products; or

(3) that is registered as a landscape architect under IC 25-4-2 and while the individual or business is engaged in the practice of landscape architecture planning the use of land or water.

Sec. 13. The board may, upon application and payment of a fee established by the board in the board's rules, issue a certificate of registration as a professional engineer to an individual who holds a valid certificate of registration as a professional engineer, issued to the applicant by the proper authority of any state or territory or possession of the United States if the requirements for registration of professional engineers that the certificate of registration was issued under do not conflict with the provisions of this chapter. In determining the qualifications of an applicant, the board may accept the verified professional record of the applicant that is certified by the National Council of Examiners for Engineers and Surveyors. However, an applicant meets the experience requirement under section 3 of this chapter if the applicant:

(1) has at least three (3) years of engineering work experience after the applicant graduates from an approved engineering curriculum but before the applicant successfully passes an examination required under section 5 of this chapter; and

(2) has been registered or licensed as a professional engineer in another state for at least ten (10) years.

Sec. 14. A certificate of registration, or a certification as an engineering intern to replace a certificate which has been lost, destroyed, or mutilated, may be issued subject to the rules of the board and the fee established under IC 25-1-8-2.

Sec. 15. A person who:

(1) practices or offers to practice engineering without being

- 1 registered or exempted under the laws of this state;
- 2 (2) presents as the person's own the certificate of registration
- 3 or the seal of another;
- 4 (3) gives any false or forged evidence of any kind to the board
- 5 or to any member of the board in obtaining a certificate of
- 6 registration;
- 7 (4) impersonates any other registrant;
- 8 (5) uses an expired, suspended, or revoked certificate of
- 9 registration; or
- 10 (6) otherwise violates this chapter;

11 commits a Class B misdemeanor.

12 Sec. 16. (a) It is the duty of all law enforcement officers of this
13 state, or any political subdivision, to enforce the provisions of this
14 chapter and to apprehend and prosecute any person who violates
15 any of the provisions of this chapter.

16 (b) The attorney general shall act as the legal advisor of the
17 board and render any legal assistance as may be necessary in
18 carrying out the provisions of this chapter.

19 (c) The attorney general and the licensing agency may use the
20 registered professional engineers and registered engineering
21 interns investigative fund established by section 20 of this chapter
22 to hire investigators and other employees to enforce the provisions
23 of this chapter and to investigate and prosecute violations of this
24 chapter.

25 Sec. 17. (a) The attorney general, the prosecuting attorney of
26 any county, the board, or a citizen of any county where a person
27 who is not exempted engages in the practice of engineering without
28 first having obtained a certificate of registration or without first
29 having renewed an expired certificate of registration may, in
30 accordance with the provisions of the laws of this state governing
31 injunctions, file an action in the name of the state of Indiana to
32 enjoin that person from engaging in the practice of engineering
33 until a certificate of registration is secured or renewed.

34 (b) Any person who has been enjoined and violates an injunction
35 shall be punished for contempt of court. An injunction does not
36 relieve a person engaged in the practice of engineering without a
37 certificate of registration or without first having renewed an
38 expired certificate of registration from a criminal prosecution.

39 (c) The remedy by injunction is in addition to any remedy
40 provided for herein for the criminal prosecution of the offender. In
41 charging any person in a complaint for violation of the provisions
42 of this chapter by engaging in the practice of engineering without

1 a certificate of registration or without having renewed an expired
 2 certificate of registration, it is sufficient to charge that the
 3 offender:

4 (1) on a certain day in a certain county practiced or offered to
 5 practice engineering; and

6 (2) was not registered or exempted under this chapter.

7 Sec. 18. (a) Except as provided in IC 25-4-1-11, a person
 8 registered as a professional engineer under this chapter is exempt
 9 from the provisions of any and all statutes in force in this state
 10 regulating the practice of architecture.

11 (b) This chapter does not apply to an individual registered as an
 12 architect under IC 25-4-1. An architect, however, who is registered
 13 under IC 25-4-1 and exempted from this chapter may not use the
 14 designation "engineer" in any form or manner unless the architect
 15 is registered under this chapter.

16 Sec. 19. (a) This section does not apply to a job position filled by
 17 the department of environmental management.

18 (b) Unless a job position is filled by a professional engineer, the
 19 state or a political subdivision (as defined in IC 36-1-2-13) may not
 20 use the word "engineer" in the position's job title.

21 Sec. 20. (a) The registered professional engineers and registered
 22 engineering interns investigative fund is established to provide
 23 funds for administering and enforcing the provisions of this
 24 chapter, including investigating and taking enforcement action
 25 against violators of this chapter. The fund shall be administered by
 26 the attorney general and the licensing agency.

27 (b) The expenses of administering the fund shall be paid from
 28 the money in the fund. The fund consists of money from the fee
 29 imposed upon registered professional engineers and registered
 30 engineering interns under section 9(b) of this chapter.

31 (c) The treasurer of state shall invest the money in the fund not
 32 currently needed to meet the obligations of the fund in the same
 33 manner as other public money may be invested.

34 (d) Money in the fund at the end of a state fiscal year does not
 35 revert to the state general fund. If the total amount in the fund
 36 exceeds five hundred thousand dollars (\$500,000) at the end of a
 37 state fiscal year after payment of all claims and expenses, the
 38 amount that exceeds five hundred thousand dollars (\$500,000)
 39 reverts to the state general fund.

40 (e) Money in the fund is continually appropriated for use by the
 41 attorney general and the licensing agency to administer and
 42 enforce the provisions of this chapter and to conduct investigations

1 and take enforcement action against persons violating the
2 provisions of this chapter.

3 **Sec. 21. The board shall send written notice to the department**
4 **of homeland security established by IC 10-19-2-1 of the**
5 **determination of the board in a disciplinary action against an**
6 **engineer under IC 25-1-11. The board shall send the notice not**

8 **determination.**
