FISCAL IMPACT STATEMENT**

LS 7050
BILL NUMBER: HB 1358

NOTE PREPARED: Jan 5, 2026
BILL AMENDED:

SUBJECT: Indiana Department of Health.

FIRST AUTHOR: Rep. Barrett
FIRST SPONSOR:

BILL STATUS: As Introduced

FUNDS AFFECTED: X GENERAL
 X DEDICATED
 FEDERAL

IMPACT: State

Summary of Legislation: This bill removes various reporting requirements for the Indiana Department of Health (IDOH) and requires the IDOH to make certain information available on the IDOH website. It changes the statewide standing order for the dispensing of a smoking cessation product to a tobacco, vaping, or nicotine cessation product. It amends the date by which a hospital must submit the hospital's fiscal report and patient information report to the IDOH. It requires: (1) the IDOH to maintain a trauma registry; and (2) certain health care facilities to submit data to the registry. It establishes requirements for the handling and transporting of infectious waste. It sets forth factors the IDOH must consider in determining the nature of and civil penalty for a violation of infectious waste requirements.

The bill expands provisions concerning epinephrine, including provisions allowing a pharmacist to dispense and an entity to prescribe epinephrine, to epinephrine and removes the expiration of provisions concerning lead screening for children. It requires a registered manufacturer, processor, repackager, or wholesale distributor of food, drugs, or cosmetics to comply with federal regulations concerning good manufacturing practices and allows the state health commissioner to enter and inspect the premises of the manufacturer, processor, repackager, or wholesale distributor. It permits a local health department to conduct inspections of certain manufacturers, processors, repackagers, or wholesale distributors. The bill amends the information a local child fatality review team and the statewide child fatality review committee may review in conducting a child fatality review and allows a suicide and overdose fatality review team and a fetal-infant mortality review team to provide records to the IDOH and requires the IDOH to maintain the confidentiality of these records. It requires a medical school to: (1) include nutrition education in the school's curriculum; and (2) require students to complete a rural health rotation. The bill also voids administrative rules concerning infectious waste and the state trauma registry.

Effective Date: July 1, 2026.

Explanation of State Expenditures: This bill will have a minimal workload impact on the IDOH but should be able to be implemented using existing staffing and resources. Certain provisions in the bill codify current administrative rules (state trauma registry, infectious waste) and some provisions eliminate or streamline reporting requirements for IDOH. *[IDOH administration is funded by the Tobacco Master Settlement Fund,*

a dedicated fund.]

The medical school provision will increase workload for the Indiana University School of Medicine, to update their curriculum for certain health education programs and modify the entities that they partner with to provide clinical experience to its students, as prescribed in the bill. *[Indiana University receives state funding through General Fund Appropriations.]*
