IMPACT: State & Local

Summary of Legislation: This bill provides that choice of law and certain indemnity provisions contained in contracts entered into, amended, or renewed after June 30, 2026, between a school and a vendor are against public policy and are void and unenforceable. It provides that a public school, including a charter school, that refuses to allow certain organizations to provide information to students on school property are subject to a reduction of state tuition support.

Effective Date: July 1, 2026.

Explanation of State Expenditures: Under the bill, if public schools do not allow certain organizations to come to the school to provide information to students twice per year, the Department of Education (DOE) would reduce the monthly distribution of state tuition support to that school by \$1,000 each month until the school satisfies the bill's requirements. The bill specifies that funds withheld under this provision cannot be returned to the school. Any potential decrease in state expenditures would be minor.

Explanation of State Revenues:

Explanation of Local Expenditures: School corporations will need to ensure their vendor contracts are in compliance with the bill's provisions. This will be completed with existing staff and resources.

Explanation of Local Revenues: To the extent public schools do not meet certain requirements, state tuition support revenue could be reduced. The revenue loss, if any, would be minor.
