 15 following apply:
- 16 (A) The surface water does not attain water quality standards  
 17 (as established in ~~327 IAC 2-1 and 327 IAC 2-1.5~~ **by rule**)  
 18 due to an individual pollutant, multiple pollutants, pollution,  
 19 or an unknown cause of impairment.
- 20 (B) The surface water:
- 21 (i) receives a thermal discharge from one (1) or more point  
 22 sources; and  
 23 (ii) does not have or maintain a balanced indigenous

 16          IC 13-11-2-149.6.
- 17          (e) "Watershed" has the meaning set forth in IC 14-8-2-310.
- 18          (f) The board may designate a water body as an outstanding state  
 19          resource water by rule if the board determines that the water body has  
 20          a unique or special ecological, recreational, or aesthetic significance.
- 21          (g) Before the board may adopt a rule designating a water body as  
 22          an outstanding state resource water, the board must consider the  
 23          following:
- 24               (1) Economic impact analyses, presented by any interested party,  
 25               taking into account future population and economic development  
 26               growth.
- 27               (2) The biological criteria scores for the water body, using factors

 2 an outstanding state resource water, the board must make available to  
 3 the public a written summary of the information considered by the  
 4 board under subsections (f) and (g), including the board's conclusions  
 5 concerning that information.

 7 **committees on environmental affairs**, the commissioner shall present  
 8 a summary of the comments received from the comment period and  
 9 information that supports a water body designation as an outstanding  
 10 state resource water to the interim study committee on environmental  
 11 affairs established by ~~IC 2-5-1.3-4~~ in an electronic format under  
 12 IC 5-14-6. ~~not later than one hundred twenty (120) days after the rule~~  
 13 ~~regarding the designation is finally adopted by the board.~~

14 (j) Notwithstanding any other provision of this section, the  
 15 designation of an outstanding state resource water in effect on January  
 16 1, 2000, remains in effect.

17 (k) For a water body designated as an outstanding state resource  
 18 water, the board shall provide by rule procedures that will:

- 19 (1) prevent degradation; and  
 20 (2) allow for increases and additions in pollutant loadings from an  
 21 existing or new discharge if:  
 22 (A) there will be an overall improvement in water quality for  
 23 the outstanding state resource water as described in this  
 24 section; and  
 25 (B) the applicable requirements of rules adopted by the board  
 26 under this section are met.

27 (l) The procedures provided by rule under subsection (k) must  
 28 include the following:

- 29 (1) A definition of significant lowering of water quality that  
 30 includes a de minimis quantity of additional pollutant load:  
 31 (A) for which a new or increased permit limit is required; and  
 32 (B) below which antidegradation implementation procedures  
 33 do not apply.  
 34 (2) Provisions allowing the permittee to choose application of one  
 35 (1) of the following for each activity undertaken by the permittee  
 36 that will result in a significant lowering of water quality in the  
 37 outstanding state resource water:  
 38 (A) Implementation of a water quality project in the watershed  
 39 of the outstanding state resource water that will result in an  
 40 overall improvement of the water quality of the outstanding  
 41 state resource water.  
 42 (B) Payment of a fee, not to exceed five hundred thousand

- 1           dollars (\$500,000), based on the type and quantity of increased  
 2           pollutant loadings, to the department for deposit in the  
 3           outstanding state resource water improvement fund established  
 4           under section 14 of this chapter for use as permitted under that  
 5           section.
- 6           (3) Criteria for the submission and timely approval of projects  
 7           described in subdivision (2)(A).
- 8           (4) A process for public input in the approval process.
- 9           (5) Use of water quality data that is less than seven (7) years old  
 10          and specific to the outstanding state resource water.
- 11          (6) Criteria for using the watershed improvement fees to fund  
 12          projects in the watershed that result in improvement in water  
 13          quality in the outstanding state resource water.
- 14          (m) For a water body designated as an outstanding state resource  
 15          water after June 30, 2000, the board shall provide by rule  
 16          antidegradation implementation procedures before the water body is  
 17          designated in accordance with this section.
- 18          (n) A water body may be designated as an outstanding national  
 19          resource water only by the general assembly after recommendations for  
 20          designation are made by the board and the interim study committee on  
 21          environmental affairs established by IC 2-5-1.3-4.
- 22          (o) Before recommending the designation of an outstanding national  
 23          resource water, the department shall provide for an adequate public  
 24          notice and comment period regarding the designation. The  
 25          commissioner shall present a summary of the comments and  
 26          information received during the comment period and the department's  
 27          recommendation concerning designation to the ~~interim study~~  
 28          ~~committee on environmental affairs established by IC 2-5-1.3-4~~ **house**  
 29          **of representatives or senate committees on environmental affairs**  
 30          in an electronic format under IC 5-14-6 not later than ninety (90) days  
 31          after the end of the comment period. The committee shall consider the  
 32          comments, information, and recommendation received from the  
 33          department, and shall convey its recommendation concerning  
 34          designation to the general assembly within six (6) months after receipt.
- 35          (p) This subsection applies to all surface waters of the state. The  
 36          department shall complete an antidegradation review of all NPDES  
 37          general permits. The department may modify the general permits for  
 38          purposes of antidegradation compliance. After an antidegradation  
 39          review of a permit is conducted under this subsection, activities  
 40          covered by an NPDES general permit are not required to undergo an  
 41          additional antidegradation review. An NPDES general permit may not  
 42          be used to authorize a discharge into an outstanding national resource

1 water or an outstanding state resource water, except that a short term,  
 2 temporary storm water discharge to an outstanding national resource  
 3 water or to an outstanding state resource water may be permitted under  
 4 an NPDES general permit if the commissioner determines that the  
 5 discharge will not significantly lower the water quality downstream of  
 6 the discharge.

7 (q) Subsection (r) applies to:

8 (1) an application for an NPDES permit subject to  
 9 IC 13-15-4-1(a)(2)(B), IC 13-15-4-1(a)(3)(B), or  
 10 IC 13-15-4-1(a)(4); or

11 (2) an application for a modification or renewal of an NPDES  
 12 permit;

13 that proposes new or increased discharge that would result in a  
 14 significant lowering of water quality as defined in subsection (l)(1).

15 (r) For purposes of an antidegradation review with respect to an  
 16 application referred to in subsection (q), the applicant shall  
 17 demonstrate at the time the application is submitted to the department,  
 18 and the commissioner shall review:

19 (1) an analysis of alternatives to the proposed discharge; and

20 (2) subject to subsection (s), social or economic factors indicating  
 21 the importance of the proposed discharge if alternatives to the  
 22 proposed discharge are not practicable.

23 (s) Subject to subsection (t), the commissioner shall consider the  
 24 following factors in determining whether a proposed discharge is  
 25 necessary to accommodate important economic or social development  
 26 in the area in which the waters are located under antidegradation  
 27 standards and implementation procedures:

28 (1) Creation, expansion, or maintenance of employment.

29 (2) The unemployment rate.

30 (3) The median household income.

31 (4) The number of households below the poverty level.

32 (5) Community housing needs.

33 (6) Change in population.

34 (7) The impact on the community tax base.

35 (8) Provision of fire departments, schools, infrastructure, and  
 36 other necessary public services.

37 (9) Correction of a public health, safety, or environmental  
 38 problem.

39 (10) Production of goods and services that protect, enhance, or  
 40 improve the overall quality of life and related research and  
 41 development.

42 (11) The impact on the quality of life for residents in the area.

- 1 (12) The impact on the fishing, recreation, and tourism industries.  
 2 (13) The impact on threatened and endangered species.  
 3 (14) The impact on economic competitiveness.  
 4 (15) Demonstration by the permit applicant that the factors  
 5 identified and reviewed under subdivisions (1) through (14) are  
 6 necessary to accommodate important social or economic  
 7 development despite the proposed significant lowering of water  
 8 quality.  
 9 (16) Inclusion by the applicant of additional factors that may  
 10 enhance the social or economic importance associated with the  
 11 proposed discharge, such as an approval that:  
 12 (A) recognizes social or economic importance; and  
 13 (B) is given to the applicant by:  
 14 (i) a legislative body; or  
 15 (ii) other government officials.  
 16 (17) Any other action or recommendation relevant to the  
 17 antidegradation demonstration made by a:  
 18 (A) state;  
 19 (B) county;  
 20 (C) township; or  
 21 (D) municipality;  
 22 potentially affected by the proposed discharge.  
 23 (18) Any other action or recommendation relevant to the  
 24 antidegradation demonstration received during the public  
 25 participation process.  
 26 (19) Any other factors that the commissioner:  
 27 (A) finds relevant; or  
 28 (B) is required to consider under the Clean Water Act.  
 29 (t) In determining whether a proposed discharge is necessary to  
 30 accommodate important economic or social development in the area in  
 31 which the waters are located under antidegradation standards and  
 32 implementation procedures, the commissioner:  
 33 (1) must give substantial weight to any applicable determinations  
 34 by governmental entities; and  
 35 (2) may rely on consideration of any one (1) or a combination of  
 36 the factors listed in subsection (s).  
 37 (u) Each exceptional use water (as defined in IC 13-11-2-72.5,  
 38 before its repeal) designated by the board before June 1, 2009, becomes  
 39 an outstanding state resource water on June 1, 2009, by operation of  
 40 law.  
 41 (v) Beginning June 1, 2009, all waters of the state are classified in  
 42 the following categories:

- 1 (1) Outstanding national resource waters.  
 2 (2) Outstanding state resource waters.  
 3 (3) Waters of the state as ~~described in 327 IAC 2-1-2(1); as in~~  
 4 ~~effect on January 1, 2009. defined in IC 13-11-2-265.~~  
 5 (4) High quality waters as described in 327 IAC 2-1-2(2); as in  
 6 ~~effect on January 1, 2009. 40 CFR 131.12(a)(2).~~  
 7 (5) ~~Waters of the state as described in 327 IAC 2-1.5-4(a); as in~~  
 8 ~~effect on January 1, 2009.~~  
 9 (6) ~~High quality waters as described in 327 IAC 2-1.5-4(b); as in~~  
 10 ~~effect on January 1, 2009.~~

11 **(w) The board may adopt rules under IC 4-22-2 to establish a**  
 12 **process to designate a water body as a limited use water as**  
 13 **described in 40 CFR 131.12.**

14 SECTION 154. IC 13-18-3-2.5, AS AMENDED BY P.L.54-2005,  
 15 SECTION 4, IS AMENDED TO READ AS FOLLOWS [EFFECTIVE  
 16 JULY 1, 2026]: Sec. 2.5. (a) A CSO wet weather limited use  
 17 subcategory is established for waters affected by receiving combined  
 18 sewer overflows, as specified in an approved long term control plan.  
 19 The CSO wet weather limited use subcategory applies to a specific  
 20 water body after implementation of an approved long term control plan  
 21 for the combined sewer system whose overflow discharges affect those  
 22 waters is implemented and the conditions of subsection (b) are  
 23 satisfied. The following requirements apply to the CSO wet weather  
 24 limited use subcategory:

- 25 (1) The water quality based requirements associated with the CSO  
 26 wet weather limited use subcategory that apply to waters affected  
 27 by wet weather combined sewer overflows are determined by an  
 28 approved long term control plan for the combined sewer system.  
 29 The water quality based requirements remain in effect during the  
 30 time and to the physical extent that the recreational use  
 31 designation that applied to the waters immediately before the  
 32 application to the waters of the CSO wet weather limited use  
 33 subcategory is not attained, but for not more than four (4) days  
 34 after the date the overflow discharge ends.  
 35 (2) At all times other than those described in subdivision (1), the  
 36 water quality criteria associated with the appropriate recreational  
 37 use designation that applied to the waters immediately before the  
 38 application to the waters of the CSO wet weather limited use  
 39 subcategory apply unless there is a change in the use designation  
 40 as a result of a use attainability analysis.  
 41 (b) The CSO wet weather limited use subcategory applies if:  
 42 (1) the department has approved a long term control plan for the

- 1 NPDES permit holder for the combined sewer system;  
 2 (2) the approved long term control plan:  
 3 (A) is incorporated into:  
 4 (i) the NPDES permit holder's NPDES permit; or  
 5 (ii) an order of the commissioner under IC 13-14-2-6;  
 6 (B) satisfies the requirements of section 2.3 of this chapter;  
 7 and  
 8 (C) specifies the water quality based requirements that apply  
 9 to combined sewer overflows during and immediately  
 10 following wet weather events, as provided in subsection (a)(1);  
 11 (3) the NPDES permit holder has implemented the approved long  
 12 term control plan; and  
 13 (4) subject to subsection (c), 40 CFR 131.10, 40 CFR 131.20, and  
 14 40 CFR 131.21 are satisfied.  
 15 (c) For purposes of subsection (b)(4), 40 CFR 131.10 may be  
 16 satisfied by including appropriate data and information in the long term  
 17 control plan.  
 18 (d) The department shall implement the CSO wet weather limited  
 19 use subcategory and associated water quality based requirements under  
 20 this section when the subcategory and requirements are approved by  
 21 the United States Environmental Protection Agency. The department  
 22 shall seek approval of the United States Environmental Protection  
 23 Agency in a timely manner.  
 24 (e) The NPDES permit holder shall monitor its discharges and the  
 25 water quality in the affected receiving stream periodically as provided  
 26 in the long term control plan. The NPDES permit holder shall provide  
 27 all such information to the department.  
 28 (f) In conjunction with a review of its long term control plan under  
 29 section 2.4 of this chapter, the NPDES permit holder shall review  
 30 information generated after the use attainability analysis was approved  
 31 by the department to determine whether the conclusion of the use  
 32 attainability analysis is still valid. The NPDES permit holder shall  
 33 provide the results of the review to the department.  
 34 (g) The board shall adopt rules under IC 13-14-8 and IC 13-14-9 to  
 35 implement this section. ~~before October 1, 2006.~~

 38 JULY 1, 2026]: Sec. 2.6. (a) Where appropriate, permits shall contain  
 39 schedules of compliance requiring the permittee to take specific steps  
 40 to achieve expeditious compliance with applicable standards,  
 41 limitations, and other requirements.  
 42 (b) The schedule of compliance shall require compliance as soon as

1 reasonably possible, but **not later than five (5) years from the date**  
 2 **applicable standards, limitations, or other requirements are**  
 3 **incorporated into the permit and** may remain in effect as long as the  
 4 National Pollutant Discharge Elimination System (NPDES) permit  
 5 requirements are in effect.

6 (c) The department shall, at the request of the NPDES permit  
 7 holder, incorporate in the permit a schedule of compliance for meeting  
 8 the water quality based requirements associated with combined sewer  
 9 overflows during the period of development, approval, and  
 10 implementation of the long term control plan. The schedules of  
 11 compliance:

12 (1) may exceed time frames authorized under 327 IAC; and

13 (2) may not exceed the period specified for implementation in an  
 14 approved long term control plan.

15 (d) If the term of a schedule of compliance exceeds the term of an  
 16 NPDES permit, the department shall continue to implement the  
 17 schedule of compliance continuously before and during each  
 18 successive permit term, to the maximum duration as provided in  
 19 subsection (c). The permit shall specify that the schedule of compliance  
 20 lasts beyond the term of the permit.

21 (e) Upon request of the permittee, the department shall modify  
 22 NPDES permits containing water quality based requirements  
 23 associated with combined sewer overflows to provide schedules of  
 24 compliance as provided in subsection (c).

25 (f) The board shall adopt rules under IC 13-14-8 and IC 13-14-9 to  
 26 implement this section. ~~before October 1, 2006.~~

 40 SECTION 50, IS AMENDED TO READ AS FOLLOWS [EFFECTIVE  
 41 JULY 1, 2026]: Sec. 1. (a) Subject to subsections (b)(1) and (d), the  
 42 commissioner may, under rules adopted under IC 13-23-1-2:

- 1 (1) issue an order under IC 13-14-2-7 or IC 4-21.5-4; or  
 2 (2) proceed under IC 13-14-2-6;  
 3 to require the owner or operator of an underground storage tank or  
 4 aboveground storage tank to undertake corrective action with respect  
 5 to any release of a regulated substance.
- 6 (b) Except as provided in subsection (d), the commissioner may not,  
 7 with respect to a release of petroleum from an underground storage  
 8 tank or aboveground storage tank:
- 9 (1) take action under subsection (a); or  
 10 (2) if a reportable quantity of the released petroleum remains or  
 11 may remain underground at the site of the underground storage  
 12 tank or aboveground storage tank:
- 13 (A) request that the owner or operator of the underground  
 14 storage tank or aboveground storage tank execute a restrictive  
 15 covenant (as defined in IC 13-11-2-193.5) applying to the site  
 16 of the underground storage tank or aboveground storage tank;  
 17 (B) make a determination of no further action being required  
 18 at the site of the underground storage tank or aboveground  
 19 storage tank; or  
 20 (C) approve closure, or its equivalent, of the site of the  
 21 underground storage tank or aboveground storage tank;  
 22 unless the commissioner has received and reviewed the initial site  
 23 characterization of the site of the release or an alternative evaluation is  
 24 prepared for submittal to the commissioner in accordance with  
 25 subsection (c) **and an evaluation of potential remedial activities to**  
 26 **achieve remedial objectives including closure options,**  
 27 **environmental deed restrictions, and remediation methods to**  
 28 **achieve a no further action determination, including estimated**  
 29 **costs and time frames sufficient for the commissioner to evaluate**  
 30 **the adequacy of the proposed response.**
- 31 (c) When necessary and feasible as determined by a qualified  
 32 environmental professional, an initial site characterization shall  
 33 include:
- 34 (1) site-specific geologic information obtained from a minimum  
 35 of three (3) continuously sampled soil borings; and  
 36 (2) hydrogeologic information, including depth to ground water  
 37 and ground water flow directions and gradients, obtained from a  
 38 minimum of three (3) monitoring wells screened across the water  
 39 table.
- 40 A qualified environmental professional, on behalf of the owner or  
 41 operator of an underground storage tank or an aboveground storage  
 42 tank from which there has been a release of petroleum, may submit for

1 approval by the commissioner an alternative procedure for initial site  
 2 characterization and request a waiver of the requirements in this  
 3 subsection. The commissioner may approve the request for a waiver  
 4 and alternative procedure only if the alternative procedure provides  
 5 substantially equal protection for human health and the environment.  
 6 If an initial site characterization does not define the nature and extent  
 7 of the contaminant plume, additional investigation shall be performed  
 8 when necessary and feasible as determined by a qualified  
 9 environmental professional.

10 (d) The commissioner may take action under subsection (a) without  
 11 having received and reviewed the initial site characterization if the  
 12 commissioner reasonably believes that the release from the  
 13 underground storage tank or aboveground storage tank creates a threat  
 14 to human health or the environment sufficient to necessitate action  
 15 under subsection (a) before the initial site characterization is submitted  
 16 to the department.

17 (e) If the commissioner:

18 (1) requires corrective action under subsection (a); and

19 (2) determines that the corrective action will be done properly and  
 20 promptly by the owner or operator of the underground storage  
 21 tank or aboveground storage tank from which the release occurs;  
 22 the commissioner may enter into an agreed order with the owner or  
 23 operator to implement necessary corrective action.

"SECTION 264. IC 13-23-13-1, AS AMENDED BY P.L.176-2023, SECTION 50, IS AMENDED TO READ AS FOLLOWS [EFFECTIVE JULY 1, 2026]: Sec. 1. (a) Subject to subsections (b)(1) and (d), the commissioner may, under rules adopted under IC 13-23-1-2:

- (1) issue an order under IC 13-14-2-7 or IC 4-21.5-4; or
- (2) proceed under IC 13-14-2-6;

to require the owner or operator of an underground storage tank or aboveground storage tank to undertake corrective action with respect to any release of a regulated substance.

(b) Except as provided in subsection (d), the commissioner may not, with respect to a release of petroleum from an underground storage tank or aboveground storage tank:

- (1) take action under subsection (a); or
- (2) if a reportable quantity of the released petroleum remains or may remain underground at the site of the underground storage tank or aboveground storage tank:
  - (A) request that the owner or operator of the underground storage tank or aboveground storage tank execute a restrictive covenant (as defined in IC 13-11-2-193.5) applying to the site of the underground storage tank or aboveground storage tank;
  - (B) make a determination of no further action being required at the site of the underground storage tank or aboveground storage tank; or
  - (C) approve closure, or its equivalent, of the site of the underground storage tank or aboveground storage tank;

unless the commissioner has received and reviewed the initial site characterization of the site of the release or an alternative evaluation is prepared for submittal to the commissioner in accordance with subsection (c) **and an evaluation of potential remedial activities to achieve remedial objectives including closure options, environmental deed restrictions, and remediation methods to achieve a no further action determination, including estimated costs and time frames sufficient for the commissioner to evaluate the adequacy of the proposed response.**

(c) When necessary and feasible as determined by a qualified environmental professional, an initial site characterization shall include:

- (1) site-specific geologic information obtained from a minimum of three (3) continuously sampled soil borings; and
- (2) hydrogeologic information, including depth to ground water and ground water flow directions and gradients, obtained from a minimum of three (3) monitoring wells screened across the water table.

A qualified environmental professional, on behalf of the owner or operator of an underground storage tank or an aboveground storage tank from which there has been a release of petroleum, may submit for approval by the commissioner an alternative procedure for initial site characterization and request a waiver of the requirements in this subsection. The commissioner may approve the request for a waiver and alternative procedure only if the alternative procedure provides substantially equal protection for human health and the environment.

If an initial site characterization does not define the nature and extent of the contaminant plume, additional investigation shall be performed when necessary and feasible as determined by a qualified environmental professional.

(d) The commissioner may take action under subsection (a) without having received and reviewed the initial site characterization if the commissioner reasonably believes that the release from the underground storage tank or aboveground storage tank creates a threat to human health or the environment sufficient to necessitate action under subsection (a) before the initial site characterization is submitted to the department.

(e) If the commissioner:

(1) requires corrective action under subsection (a); and  
 (2) determines that the corrective action will be done properly and promptly by the owner or operator of the underground storage tank or aboveground storage tank from which the release occurs; the commissioner may enter into an agreed order with the owner or operator to implement necessary corrective action."
