69th Legislature 2025 Drafter: Julie Johnson, HB0006.001.005

1 conditions set forth in [sections 2 and 3] and the contingencies described in the renewable resource grant and 2 loan program's January 2025 report to the 69th legislature titled: "Governor's Executive Budget Fiscal Years

3 2026-2027 Volume 6".

(3) Funds must be awarded up to the amounts approved in subsection (4) in the order of priority listed until the available funds are expended. Funds not accepted or used by higher-ranked projects must be provided for projects farther down the priority list that would not otherwise receive funding. If at any time a grant recipient determines that a project will not begin before June 30, 2027, the grant recipient shall notify the department of natural resources and conservation. After all eligible projects are funded, any remaining funds may be used for any renewable resource project authorized under this section.

(4) The prioritized infrastructure grant projects are as follows:

# RENEWABLE RESOURCE INFRASTRUCTURE GRANT PROJECTS

| 12 | Rank           | Applicant/Project  | Amount               |

NEW SECTION. Section 2. Coordination of fund sources for grants to political subdivisions and local governments. A grant recipient listed under [section 1(4) and (7)] may not receive funds from both the reclamation and development grants program and the renewable resource grant and loan program for the same project during the same biennium.

NEW SECTION. Section 3. Condition of grants. The disbursement of funds under [section 1] is subject to the following conditions that must be met by the grant recipient:

- (1) The grant recipient must have a scope of work, schedule, and budget for the project that is approved by the department of natural resources and conservation. Any changes in scope of work or budget after legislative approval may not alter project goals and objectives. Changes in activities that would reduce the public or natural resource benefits as presented in department of natural resources and conservation reports and applicant testimony to the 69th legislature may result in a proportional reduction in the grant amount.
- (2) The grant recipient must document that other matching funds required for completion of the project are firmly committed.
- (3) The grant recipient must have a project management plan that is approved by the department of natural resources and conservation.
- (4) The grant recipient shall comply with the auditing and reporting requirements provided for in 2-7-503 and establish a financial accounting system that the department can reasonably ensure conforms to generally accepted accounting principles. Tribal governments shall comply with the auditing and reporting

69th Legislature 2025 Drafter: Julie Johnson, HB0006.001.005

- 1 requirements provided for in 2 CFR 200.
  - (5) The grant recipient shall satisfactorily complete the conditions described in the recommendation section of the project narrative of the program report to the legislature for the biennium ending June 30, 2027, or, in the case of planning grants issued under [section 1(1)], complete the conditions specified at the time of written notification of the approved grant authority.
  - (6) The grant recipient shall execute a grant agreement with the department of natural resources and conservation.
  - (7) Any other specific requirements considered necessary by the department must be met to accomplish the purpose of the grant as evidenced from the application to the department or from the proposal as presented to the legislature.

NEW SECTION. Section 4. Local government requirements before funds are released. (1) To be eligible to receive funding under [this act], a local government shall establish and continually fund a capital reserve account meeting the requirements of subsection (3) for necessary infrastructure improvements, including but not limited to improvements to water supply systems, wastewater systems, irrigation systems, and water storage dams with water storage capacity in excess of 3,000 acre feet and that are not part of a public water system.

- (2) The capital reserve account must be established prior to the receipt of grant funds under [this act].
  - (3) The local government shall deposit into the capital reserve account:
- (a) an amount equal to 10% of the revenues received by the local government from water supply fees, wastewater system usage fees, or water delivery fees assessed by the local government; or
- (b) for the owners of water storage dams described in subsection (1), an amount equal to \$5 per acre foot of water storage capacity. Revenues or royalties from the production and sale of electricity, general fund revenues used for the maintenance of water storage dams and other structures owned by the local government, and fees levied on all members of a conservation district as the conservation district existed on January 1, 2025, where the dam is located may be used to meet the requirement of this subsection (3)(b).
  - (c) A local government may not create any form of special or improvement district to fund the

| canital | reserve | account | provided | for | in   | this | section  |
|---------|---------|---------|----------|-----|------|------|----------|
| Capitai | 1636176 | account | provided | 101 | 1111 | นแจ  | 36611011 |

- (4) A local government may only expend funds from the capital reserve account to fund projects with a total estimated cost of at least \$50,000.
- (5) As used in this section, "local government" means a county, city, town, consolidated city-county, irrigation district, drainage district, conservation district, or water users' association or ditch company organized and incorporated pursuant to Title 35, chapter 14, or Title 85, chapter 6, part 1.

NEW SECTION. Section 5. Appropriations established. There is appropriated to any entity of state government that receives a grant under [section 1] the amount of the grant upon award of the grant by the department of natural resources and conservation. Grants to entities from prior biennia are reauthorized for the completion of contract work.

<u>NEW SECTION.</u> **Section 6. Approval of grants -- completion of biennial appropriation.** The legislature, pursuant to 85-1-605, approves the renewable resource grant and loan program grants listed in [section 1]. The authorization of these grants constitutes a biennial appropriation from the natural resources projects state special revenue account established in 15-38-302.

<u>NEW SECTION.</u> **Section 7. Notification to tribal governments.** The secretary of state shall send a copy of [this act] to each federally recognized tribal government in Montana.

<u>NEW SECTION.</u> **Section 8. Severability.** If a part of [this act] is invalid, all valid parts that are severable from the invalid part remain in effect. If a part of [this act] is invalid in one or more of its applications, the part remains in effect in all valid applications that are severable from the invalid applications.

COORDINATION SECTION. Section 9. Coordination instruction. (1) If both [this act] and an act that provides additional funding for renewable resource grant and loan program grants from a source other than the natural resources projects state special revenue account established in 15-38-302 are passed and approved, the projects listed in [section 1(4) and (7) of this act] that do not receive funding from the
