16	adjust the threshold amount following a general election each even-numbered year by multiplying the threshold		
17	amount valid for the even year in which the general election was held by an inflation factor, adopted by the		
18	commissioner by rule. The rule must be written to reflect the annual average change in the consumer price		
19	index from the prior year to the year in which the general election is held. The inflation factor is determined by		
20	dividing the consumer price index for June of the even-numbered year by the consumer price index for June of		
21	the prior year. The resulting figure must be rounded up or down to the nearest \$50 increment. The
