COMMENTS

This bill amends the 2026 budget act to reflect an August budget package. The June 2026 Budget Agreement deferred action on a number of budget items until the end of session, to allow greater focus and extended discussion. Primarily, this followed a recent trend of deferring climate investment conversations until after the budget, with the Proposition 4 Climate Bond and most of the Greenhouse Gas Reduction Fund allocations from the Legislature being made in this August bill instead of the June package. Additionally, approximately \$1 billion of General Fund spending assumed in the June package was also deferred to August and is appropriated in this bill. However, that spending was accounted for in the reserve and expenditure estimate of the June package but not yet detailed in the budget itself.

This bill does include some additional costs, estimated to be less than \$80 million total, reflecting unanticipated expenses for the State that were not included in the June budget. The largest of these unexpected items is a one-time \$66 million General Fund backfill to federal funds that were anticipated to be received by the Department of Rehabilitation for support for disabled workers but are now no longer expected to be received by the State.

This bill, and its corresponding budget trailer bills, also make technical changes, corrections, and clarifications to the June budget package.

FISCAL COMMENTS

This bill identifies specific spending priorities that were budgeted in the June budget agreement but not appropriated at that time. The bill increased General Fund expenditures by under \$100 million above the June agreement to account for the unexpected loss of federal funds at the Department of Rehabilitation and other adjustments. This bill also appropriates \$2.66 billion in funds from the Safe Drinking Water, Wildfire Prevention, Drought Preparedness, and Clean Air Bond Act of 2024 (Proposition 4) and appropriates \$450 million in Greenhouse Gas Reduction Fund
